Name

Michael Soltys-Kulinicz

Address

Department of Computer Science
California State University Channel Islands
Bell Tower West 2265, One University Drive
Camarillo, CA 93012

Email: michael.soltys@csuci.edu
Web: http://www.msoltys.com → http://soltys.cs.csuci.edu

Educational Background

Ph.D.	University of Toronto, Computer Science/Mathematics, 2001 Thesis title: *Complexity of Derivations of Matrix Identities* Adviser: Professor Stephen A. Cook Area: Computational Complexity and Logic
M.Sc.	University of Toronto, Mathematics, 1996 Adviser: Professor Luis Seco
Hon. B.Sc.	University of Toronto, Mathematics, 1995

Current Status

Since 2014, Professor & Chair of Computer Science at CSU Channel Islands.

Areas of Interest

Algorithms: I am especially interested in proofs of correctness of algorithms, as well as issues related to complexity and logic (my PhD thesis was on the algorithmic and logical foundations of linear algebra). I have just finished writing the 3rd editions of my book on the analysis of algorithms, and I have written a book on complexity. I am interested in algorithmic applications to combinatorial matrix theory, strings, ranking and proof complexity. **Cybersecurity:** My work includes consulting and development in information security and digital forensics. I work for the SoCal High Technology Task Force (HTTF) and I am the directory of security for Executek International.

Academic Employment History

August 2014	**Professor and Chair** California State University at Channel Islands Chair of Computer Science
August 2014	**Adjunct Professor** McMaster University, Computing and Software
July 2013	**Professor** McMaster University, Computing and Software
July 2006	**Associate Professor** McMaster University, Computing and Software
July 2012–December 2012	**Visiting Professor** Department of Mathematics, University of California at San Diego
August 2007–June 2008	**Visiting Ulam Professor** Department of Mathematics, University of Colorado at Boulder
February 2008	**Visiting Scholar** *XV Escuela de Verano de Ciencias Infromáticas* Departamento de Computación, Universidad Nacional de Río Cuarto
May and June 2007	**Visiting Scholar** Algorithmics Research Group, Jagiellonian University
July 2001–July 2006	**Assistant Tenure-track Professor** McMaster University, Computing and Software
1999–2001	**Lecturer**, University of Toronto, Computer Science

Teaching

See: http://www.msoltys.com/teaching

Supervision of Graduate Students

1. **M.Sc.** Ryan McIntyre, completed May 2018.
   Thesis title: *Bounding the size of minimal clique covers.*

2. **M.Sc.** Deepa Suryawanshi, to be completed May 2018.
   Thesis title: *Image Recognition.*

3. **M.Sc.** Chris Kuske, completed May 2018.
   Thesis title: *Derivation of consistent pairwise matrices.*

4. **M.Sc.** Dhruv Pandya, completed December 2017.
   Thesis title: *Voyager: Identifying IPs from Online Clicks.*

5. **M.Sc.** Hita Gambheer, completed December 2016.
   Thesis title: *Design Safety Verification of Medical Device Models using Automata Theory.*

6. **M.Sc.** Joel Helling, completed May 2017.
   Thesis title: *Constructing an Indeterminate String from its Associated Graph.*

7. **Ph.D.** Neerja Pophli, completed August 2016.
   Thesis title: *A Generalization of Square-Free Strings.*

8. **Ph.D.** Mohamed Sabry, in progress, expected to finish 2018.
   Subject: *Complexity/Cryptography.*

9. **Ph.D.** Ariel Fernández, completed August 2013.
   Thesis title: *Formalizing combinatorial matrix theory.*

10. **M.Eng.** Filip Jeremic, completed May 2013. Project title: *Parallel Lattice Basis Reduction.*

11. **M.Sc.** Dragan Rakas, completed May 2013.
    Thesis title: *A Proof of Concept for Homomorphically Evaluating an Encrypted Assembly Language.*

12. **M.Eng.** Mohamed Sabry, completed May 2011.
    Thesis title: *An implementation of the GGH cryptosystem.*

13. **Ph.D.** Greg Herman, completed March 2009.
    Thesis title: *Unambiguous functions in logarithmic space.*

14. **M.Sc.** Craig Wilson, completed May 2008.
    Thesis title: *Computing winning strategies for poset games.*

15. **M.Sc.** Tim Paterson, completed April 2006.
    Thesis title: *A propositional proof system with permutation quantifiers.*

16. **M.Sc.** Yu-Tong HE, co-supervised with Dr. Janicki, completed June 2003.
    Thesis title: *Verification of the WAP Transaction Layer using Model Checker SPIN.*

Publications

Books

1. Michael Soltys, *An introduction to the analysis of algorithms*, World Scientific Publishing, 3rd edition, 328 pages, 2018.

2. Michael Soltys, *An introduction to computational complexity*, Jagiellonian University Press, 143 pages (`ISBN: 978-83-233-2864-3`), 2009.

Peer reviewed journal papers

3. Ryan McIntyre and Michael Soltys *An improved upper bound and algorithm for clique covers*, Journal of Discrete Algorithms, 48:42–56, 2018.

4. Joel Helling, P.J. Ryan, W.F. Smyth, Michael Soltys, *Constructing an Indeterminate String from its Associated Graph*, Journal of Theoretical Computer Science, 710:88–96, February 2018.

5. Neerja Mhaskar and Michael Soltys *A formal framework for stringology*, Journal of Discrete Applied Mathematics, 2018. (Long journal version of 29.)

6. Ariel Fernández, Ryszard Janicki and Michael Soltys, *Computing covers from matchings with permutations*, accepted for publication in the International Journal of Computer Applications, 2017. (Long journal version of 27.)

7. Waldemar W. Koczkodaj and Dominik Strzalka and Jean-Pierr Magnot and Jiri Mazurek and James Peters and Michael Soltys and Jacek Szybowski and Arturo Tozzi and Hojjat Rakhshani, *On normalization of inconsistency indicators in pairwise comparisons*, International Journal of Approximate Reasoning, 86:73–79, July 2017.

8. Waldemar W. Koczkodaj, Ludmil Mikhailov, Grzegorz Redlarski, Jacek Szybowski, Gaik Tamazian, Michael Soltys, Elisa Wajch and Kevin Kam Fung Yuen, *Important Facts and Observations about Pairwise Comparisons*, Special Issue on Pairwise Comparisons in Fundamenta Informaticae, 144(3-4):291–307, 2016.

Peer reviewed presentations at meetings

43. Carlos Adrián Gomez, Michael Soltys and Adam Sędziwy, *iSprinkle: when education, innovation and application meet*, to be presented at 5th International Conference on Educational Innovation in Technical Careers, INDOTEC 2017, Granada, Spain.

44. Ariel Fernández and Michael Soltys, *Feasible combinatorial matrix theory: polytime proofs for König's Min-Max and related theorems*, short presentation at LICS 2013, New Orleans, Tulane University (same paper as 33).

45. Michael Soltys and Greg Herman, *Unambiguous functions in logarithmic space*, 5th Conference on Computability in Europe (CiE), (pages 162–175 in booklet of presented papers), Heidelberg, August 2009.

46. Michael Soltys and Craig Wilson, *On the complexity of computing winning strategies for finite poset games*, 4th Conference on Computability in Europe (CiE), (pages 415–424 in booklet of presented papers), Athens, June 2008.

47. Michael Soltys, *Feasible proofs of matrix identities with Csanky's algorithm*, The 7th International Workshop on Logic and Computational Complexity, LCC, affiliated with the 20th Annual IEEE Symposium on Logic in Computer Science (LICS), Chicago, June 2005.

Technical reports

48. Michael Soltys, *Gaussian lattice reduction algorithm terminates in polynomial time*, McMaster Computing and Software Technical Report (CAS-11-10-MS), 2011.

49. Michael Soltys, *A note on finding a rational symmetric matrix for a given separable polynomial*, McMaster Computing and Software Technical Report (CAS-08-12-MS), 2008.

50. Greg Herman and Michael Soltys, *A polytime proof of correctness of the Rabin-Miller algorithm from Fermat's little theorem*, arXiv (CoRR `abs/0811.3959`), 2008.

51. David L. Parnas and Michael Soltys, *Basic Science for Software Developers*, McMaster SQRL Technical Report (7), 2002.

52. Michael Soltys, *A Model-Theoretic Proof of the Completeness of LK Proofs*, McMaster Computing and Software Technical Report (CAS-06-05-MS), 1999.

Editorial Board

53. David Bremner, Antoine Deza and Michael Soltys, *Foreword: selected papers from the Franco-Canadian workshop on combinatorial algorithms*, Journal of Combinatorial Optimization, 16(4):323, 2008.

For a list of selected talks see my web page.

Honors and Awards

1. The Kościuszko Foundation Collegium of Eminent Scientists of Polish Origin and Ancestry, 2018.
2. CSU Channel Islands, 2016 Business & Technology Partnership Leadership Award.
3. Best Paper award at KES'2014 conference (see *Peer reviewed conference proceedings* paper number 32).
4. The Best Prof Award on April 10, 2013, from the Software Engineering Club.
5. McMaster Student Union teaching award for the faculty of Engineering, 2010/2011.
6. Ulam Visiting Professor Fellowship, University of Colorado at Boulder, 2007/2008
7. University of Toronto, Computer Science Student Union, award for teaching excellence 1999/2000.
